

WORSHIP SITE HEALTH EDUCATION PROGRAM (WSHEP)

MINISTRY FACSIMILE RESPONSE FORM

Please return via fax to 404.880.0347

Your worship site has a unique opportunity to help control one of the most widespread health problems facing our country today - High Blood Pressure. Some 58 million Americans have high blood pressure, which is a major cause of heart disease, stroke, and Kidney disease.

African Americans are more likely to have high blood pressure than any other racial group. One in every three African Americans have the disease, compared to one in four of the general population. But any one, Black or white, young or old can have high blood pressure. Alarming as the situation seems, this disease can be controlled, and, many deaths can be prevented if high blood pressure is detected early and treated. The challenge lies in reaching the people who have hypertension (High Blood Pressure). The key is proper information, diagnosis and treatment.

Your church can help control this serious disease by participating in the **2005 ISHIB Worship Site Health Education Program**. We ask that you welcome ISHIB Healthcare Professionals to speak about this important health concern.

Please select your level of participation below:

- Yes, include our Worship Site in the WSHEP on Sunday, May 1, 2005**
- Our Worship Site would like to participate on the following date** _____
- Please appoint an ISHIB Speaker** Speaker can present during the _____ AM/PM Service
- We do not require a speaker, but please send WSHEP materials**
